

Access Technology Delivery Methodology Overview

The project and solution delivery process is best summarised through the following 4 step process:

Activities:	<ul style="list-style-type: none"> High-Level Requirements Gathering 	<ul style="list-style-type: none"> Business Case Justification Detailed Requirements Gathering 	<ul style="list-style-type: none"> Installation Configuration Integration Testing Deployment Training 	<ul style="list-style-type: none"> Support Enhance Maintain
Inputs:	<ul style="list-style-type: none"> Outline Business Requirements 	<ul style="list-style-type: none"> Cost Benefit Analysis Detailed Requirements 	<ul style="list-style-type: none"> Implementation Specification 	<ul style="list-style-type: none"> Support Reference Document
Outputs:	<ul style="list-style-type: none"> High Level Proposal 	<ul style="list-style-type: none"> Business Case Detailed Quotation inc: <ul style="list-style-type: none"> Project Schedule Implementation Specification 	<ul style="list-style-type: none"> Desired Solution Support Reference Document 	<ul style="list-style-type: none"> Sustainable Solution

Please Note:

- A project delivery process with additional interim stagegates can also be used depending on the complexity and duration of the project.
- For projects below ~\$20k process step 1 and 2 can be combined.
